

Deekshith Adi H M

Software Development Engineer-II

+91 7981121773 deekshithadi.hm@gmail.com github.com/Deekshith8 LinkedIn/Deekshith

PROFESSIONAL SUMMARY

Software Development Engineer with 4.5 years of experience in building scalable enterprise applications using Java, Spring Boot, and Microservices. Skilled in distributed systems, messaging (Kafka/ActiveMQ), caching (Redis), and secure REST API development. Strong foundation in Data Structures, Algorithms, and System Design (HLD/LLD).

PROFESSIONAL EXPERIENCE

M2P Fintech

January 2025 - Present

Software Development Engineer-II

- Designed and implemented scalable fintech services using Java, Spring Boot, React.js, and ActiveMQ to handle high-volume fintech transactions.
- Developed APIs for **Loan Origination System (LOS)** covering customer onboarding, eligibility checks, document verification, and disbursement workflows.
- Fixed bugs and enhanced UI workflows in Angular for LOS, ensuring better customer experience.
- Built backend services for **Security Management System (SMS)** to manage collaterals, with role-based access control, audit logging, and compliance automation.
- Improved SMS performance by introducing Redis caching, which cut collateral lookup times by 25% and reduced DB load.
- Integrated Apache Kafka for asynchronous updates and reliable collateral event handling.
- Implemented transaction monitoring, event-driven alerts, and retry mechanisms for error recovery in SMS workflows.
- Contributed to React-based dashboards for SMS, improving reporting and user-facing functionality.
- Collaborated in design discussions, code reviews, and system optimizations to improve scalability and fault tolerance.

Tata Consultancy Services

March 2022 - Jan 2025

Associate Software Engineer

- Developed and maintained backend services for an **Insurance Policy Management System**, supporting policy creation, claims processing, and premium tracking.
- Implemented RESTful APIs with Spring Boot, Hibernate, and JDBC, optimizing queries to improve policy retrieval and claim settlement speed.
- Followed Test-Driven Development, resulting in a 15% increase in code coverage by writing comprehensive unit tests using Junit and Mockito.
- Worked in an Agile SDLC environment, participating in sprint planning, daily stand-ups, and client demos to ensure timely and high-quality deliveries.
- Enhanced code quality with SonarQube, achieving a 35% complexity reduction and 20% duplication reduction.

SKILLS

- Programming Languages** : Java ,JavaScript ,SQL ,C++
- Frameworks** : Spring Boot ,React.js ,Angular, Mockito
- Tools** : Maven, AWS, Jenkins, Postman ,MySQL ,Prometheus
- Messaging & Caching**: Kafka, ActiveMQ, Redis
- Other** : AI tools, Microservices, Data Structures and Algorithms ,High Level Design ,Low Level Design

EDUCATION

Bachelor of Engineering in Electronics and Instrumentation

2017-2021

Visvesvariah Technological University | GPA : 7.3

CERTIFICATIONS

- Spring Boot 3.0 certification
- Microservices Udemy Certification
